

Yamagata Castle VR/AR – Now Available

What is Yamagata Castle VR/AR?

Using Virtual and Augmented Reality technology, a Computer Generated image of Yamagata Castle in the mid-Edo Period is reproduced.

Download the app. (Free)
Download the app. (58MB)
Data on Yamagata Castle can be downloaded within the app. (100MB)

Why not take a photo using AR!

Go to the AR Point marked **AR** and launch the app. You can view a CG image of the Yamagata Castle on the screen. At the AR point, you can take a photo with the CG image of the Yamagata Castle.

Introduction of "Honmaru Kita Akazumon" (Main Bailey North Sealed/Emergency Gate) in detail within the app.

The app introduces each VR point with **VR** and AR point with **AR**. The instructions for use are written below the sign, so please take a look.

Recommended photo spot

This is a recommended spot for taking photos of the scenery and buildings within the park. What you can see and how it looks will change depending on the season. In the Main Courtyard in front of the Higashi Otomon (East Main Gate), there is also a photo stand where you can take pictures with the equestrian statue of Mogami Yoshiaki.

Ninomaru Higashi Otomon (Second Bailey East Main Gate)

In Heisei 3 (1991), the castle walls and ramparts were restored to their appearance during the mid-Edo period (during the time of the Hotta clan). The museum displays maps of Yamagata Castle, as well as artifacts unearthed through excavation. A highlight of the exhibit is the panel introducing the history of Yamagata Castle and related tourist sites. (The museum is closed during the winter season.)

Please scan the QR code on the official Yamagata Castle website to access information in English, Korean, and Chinese (Simplified and Traditional).
